## Results III: R&D spending topsectors 2015

An alternative sector classification has been chosen for the Top Sectors Logistics and T&U owing to the availability of data. Source: Statistics Netherlands and RVO.nl

## Top sectors approach

### **Triple helix**

- Public Private Partnership
- Demand driven
- Joint programming
- Inter-ministerial approach
- Regulations

**Aim:** to strengthen the earning capacity and competitiveness of the Dutch economy by encouraging innovation

## Working together on Smart Regulation for Innovation

*Innovation challenges public administrations towards better, adaptive regulation.*

*The Dutch government aims to:*

- Remove legal barriers for frontrunners;
- Anticipate on innovative developments when making new legislation.

Examples:

- Autonomous Driving: experimenting
- Small and Medium Enterprises: improving their position
